SOURCE: Monitored Broadcast

Helsinki broadcast in the Finnish Home Service on 4 March 1950 at 1030 GMT the following text:

"Announcement - It is announced for the benefit of listeners to the Lahti and Kuopio Radio Stations that the work on changing the wave length of the Lahti Broadcasting Station will begin on Monday morning, March 6. During the progress of this work the Kuopio Station will broadcast the Lahti program on the present Lahti wave length, that is 1875 metres. As the Kuopio Station transmitter power is weaker than that of Lahti reception will be weaker at longer distances from the Kuopio Stations. The new Lahti wave length, 1181 metres, will come into force on March 15 from early morning."
